IMPARTIALITY POLICY

BMNS Services Private Limited (BMNS) recognizes Impartiality as a mandatory requirement in conducting its all CSP (including A6.4) validation and verification activities.

To act impartially by avoiding any conflict of interest that may compromise its ability to take impartial decisions, BMNS maintains a system and related procedures to:

- Ensure that no conflict of interest exists between its VVB function and the functions of the other department or related bodies.
- Ensure integrity by avoiding any constraint due to insufficiency of human resources or financial stability.
- Deploy competent team/resources for the service and impart required training to its personnel for continual improvement.
- Ensure its personnel do not have any familiarity with the project or any relationship with the project participant that may be a threat to its impartiality.
- Independently review the report prepared by validation/verification team.
